## LINGERIE & BREAST FORMS 2020

You can find medical articles in our catalogue  
 POST-OP COMPRESSION GARMENTS & LYMPH SUPPORT GARMENTS 2020

# TriProVita system - everything from a single source

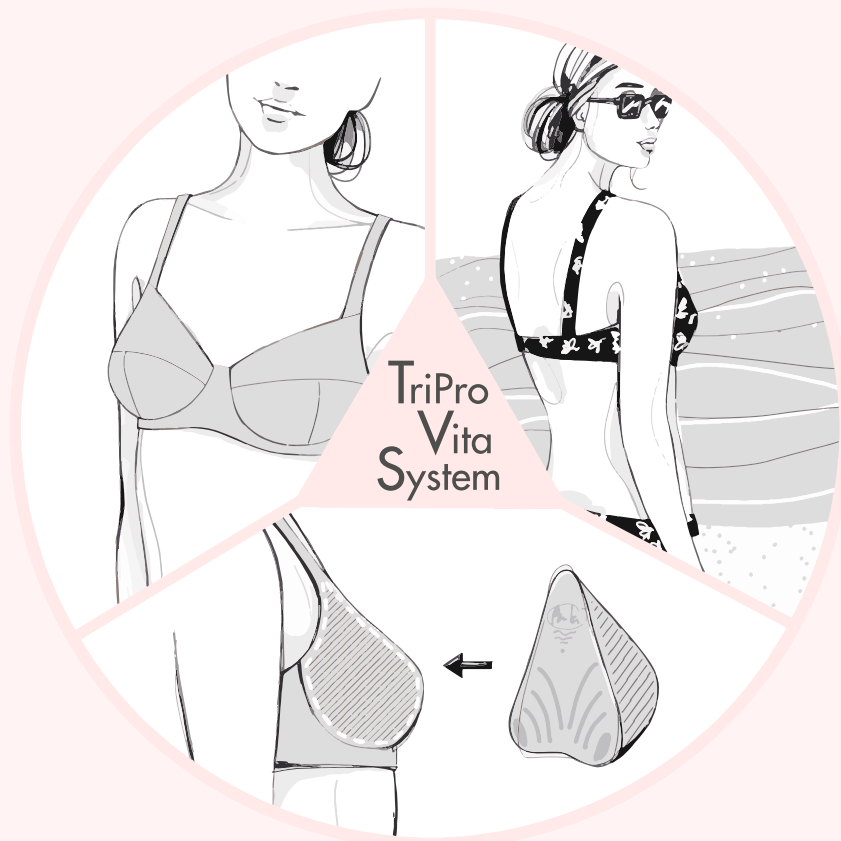

## Taking responsibility

Our competent and dedicated members of staff work in line with strict social and ecological standards all around the world. All of our products are developed in Germany and manufactured almost exclusively in our own plants in Europe and Asia.

## Tested and certified

- Tested for correct function and quality in clinical trials and studies by an independent and accredited test institute
- Certified as medical aids, approved and listed with a medical aid number
- All of our Anita care products have been certified as medical devices in accordance with the German and European Industry Standard (DIN EN) ISO 13485:2016

We guarantee all-round care from a single source, leaving your customer feeling confident and comfortable.

Anita cares.

Dear Customer

## The Anita care bras appeal through their high level of functionality and perfect fit

Please find below a short description of our function levels C1, C2 and C3 and of the accompanying icons. The function level is always given after the article number.

**Anita care bras always have the following features:**

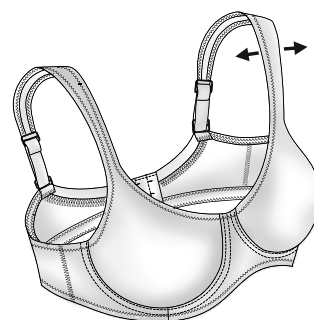

- Straps that are wider in the larger sizes
- Additional back reinforcement depending on the bra size

### Light support C1

Marked with "C1" after the article number

**Anita care post-op bras with "LIGHT" function feature:**

- Softer, lighter fabrics

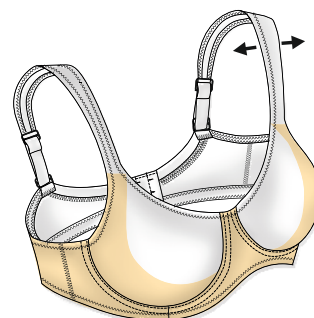

### Medium support C2

Marked with "C2" after the article no.

**Anita care bras with "MEDIUM" function feature:**

- Supporting materials throughout the whole bra plus some additional support functions

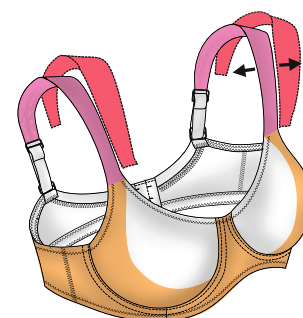

### Firm support C3

Marked with 'C3' after the article no.

**Anita care bras with "HIGH" function feature at least one of the following characteristics:**

- Firm, supporting fabrics in the cup
- Supporting fabrics at the back
- Wide, padded straps

Also after partial and restorative breast surgery

For especially sensitive skin and after radiation therapy

You can find a detailed description of symbols on page 84.

# PROMOTION

Promotional articles are key products that we believe have a huge amount of potential. We pay particular attention to these styles in our consumer communications.

Spacer cups fit the bust perfectly and give a natural shape that flatters the figure

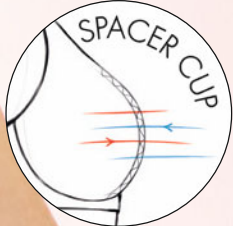

Comfort straps padded in the shoulder area

P

Covers asymmetric breast forms well

CARE

Cosamia 5311X.753

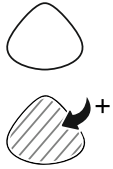

## *In good hands*

Our textile breast forms provide gentle and lightweight initial compensation and can be worn at home as a comfortable substitute for a silicone breast form. These breast forms are a good stepping stone when it comes to creating a visual balance at a time when women are often overwhelmed with their new situation and first have to get used to the changes to their body. Optimum assistance on your part together with good initial care form a solid basis of trust that will encourage affected women to later use our silicone breast forms once the body has healed.

- Gentle, skin-friendly materials go easily on sensitive scar tissue, also during radiation therapy
- No visible seams on the outside, thus guaranteeing optimal compensation
- Can be filled as required with medical fleece

### TRIFIRST 1019X

CARE

Ancona 5761X.773

## So light and so natural

Our Anita care Light & Soft breast forms are both soft and natural. Women who have undergone breast surgery can choose between “Light” and “Super light”. Despite its reduced weight, the breast form still moves like a natural breast. The Light & Soft breast forms ensure freedom of movement, excellent fit, also over uneven scar tissue, and a natural cup shape. The thin edge does a particularly good job of concealing the transition of the breast form to the skin. Also a good choice for active women.

- SoftLite silicone breast forms with or without a fold for freedom of movement
- Unique technology with the patented Flex-Gap fold: for natural movement and shaping when lying down, just like the conserved breast
- “Light” and “Super light” - the Light & Soft breast forms are up to 42% lighter than a prosthesis that would provide full weight compensation

## Amica

### AMICA SUPERSOFT 1151X

· can be used on both sides

France 75-130

100% Silicone

007

- Softest silicone formulation (Soft Touch)
- So soft that it closely resembles the natural breast

Light & Soft

Reduced-weight, two-layer, full breast forms

## Velvety

### VELVETY 1066X

· can be used on both sides

EUR 65-115  
INT 2-12  
France 80-130

100% Silicone

007

### VELVETY

#### Triangular shape with a reduced footprint

- Improved fit, also in the larger cup sizes
- The breast form is designed to not sit flat against the skin, ensuring maximum air circulation, a balanced body temperature and therefore optimum comfort
- The soft, textured back has a gentle massaging effect
- For compensation of unevenness

## Authentic

### AUTHENTIC 1020X

· can be used on both sides

EUR 65-115  
INT 2-12  
France 80-130

100% Silicone

007

Patents:  
DE 1020 1111 4187

#### Soft and thin tapering

- Naturally conceals the transition from the edge of the breast form to the skin and ensures that the breast form sits optimally and gently in the sensitive underarm area
- Perfectly compensates tissue loss

#### 2 layer technology

- Front layer made of standard gel gives the breast form a natural feel
- Rear layer made of lightweight gel provides the stability needed to ensure optimum fit

Soft and thin tapering

# Softback

## SOFTBACK 1050X

· can be used on both sides

## So I can feel free

We at Anita care are the only manufacturers in the world to make silicone breast forms with a breathable, textile, microfibre backing. A unique feature that, together with the patented ribbed construction, keeps the skin pleasantly dry. The microfibre backing covers the entire rear of all Light & Cool breast forms, allowing them to be worn directly on the skin, which feels good for the wearer. Wonderfully soft, exceptionally skin-friendly and breathable in all climatic and body conditions for a completely new feeling of comfort.

- Unique technology with breathable, textile, microfibre backing  
(the benefits of the backing are maintained only when worn with bras and pockets made of microfibre or micromodal fibre)
- Exceptionally skin-compatible
- Up to 25% lighter than comparable full breast forms with silicone gel

## So I can stay active

Anita care has developed a special breast form that women can wear during sports. It keeps the skin exceptionally cool thanks to its ribbed structure. The air chambers stop the breast form from sitting entirely on the skin, thus increasing air circulation. This can also help prevent excessive sweating. With the Light & Active breast forms, active women can plan their day's sports, relying on secure support and optimum air circulation.

- Ribbed construction with a special, lightweight design
- Brilliantly suited to all sports activities
- The water runs away more quickly when swimming thanks to the ribbed structure
- The skin can breathe thanks to the air chambers
- Up to 25% lighter than comparable full breast forms with silicone gel

## So I can feel secure

After breast surgery, even more than an evenly balanced appearance, an evenly balanced weight distribution is essential for the customer's physical well-being. Full breast forms with full weight compensation enable your customer to strike a balance not only in terms of appearance, but also in terms of weight. The different shapes offer compensation in the upper and/or lower underarm areas.

- For a natural look and feel
- Tapered edges and different shapes perfectly tend to all kinds of needs

## Ultra-light and well-balanced

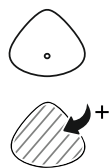

Our light partial breast forms perfectly balance out small areas of tissue loss following breast surgery. Silicone forms are available in different shapes and can be combined with a back section that is filled as required to ensure gentle correction of the breast, naturally concealing unevenness and offering a perfect fit.

- To conceal tissue loss in the breast region
- Volume can be individually adjusted
- Versatile use thanks to special forms
- Combination with microfibre backing keeps the skin pleasantly dry and ensures a high level of comfort
- Tapered edges allow a smooth transition to the skin

# Tips for garment care

- Wash by hand with soap and or take into the shower
- If the breast form has a microfibre backing, the fabric should not be pulled or torn.
- Dab the wet textile section with a paper or cotton towel. Drying time approx. 1 hour
- Pointed or sharp objects (such as animal claws) can damage the film. Such damage is irreparable
- Please do not use aggressive detergents or solvent-based cleaning agents

### Additional care tips for adhesive breast forms

- Neutral liquid soap (without silicone) and water is sufficient
- **Do not use** fabric or paper towels for drying to prevent residues being left on the adhesive surface

Pure Fresh

1086X

M0 6211.001 Austin · Cup A–E

### 1086X Pure Fresh

Soft silicone form, geared to the Anita swimwear collection

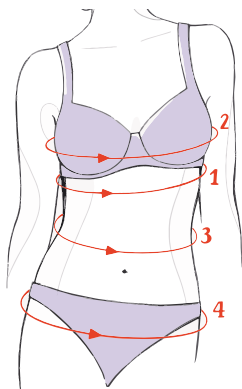

can be used on both sides

- The silicone form is especially designed for swimming and sports activities
- Suitable for thermal baths; chlorine and salt-water resistant
- The ribbed design makes sure that water runs off well and ensures optimum breathability
- Up to 25% lighter than similar models

# Find the right size for your customer following our step-by-step guide

When it comes to bras, base your measurements on a well-fitting bra, preferably one without underwires

The measured size serves as a guideline. The actual size for the best comfort of each customer can only be determined by trying the item on!

## Method 1

### Underbust measurement

Take the measurement by holding the tape directly under the bust (1). This measurement determines the bra size.

### Bust measurement

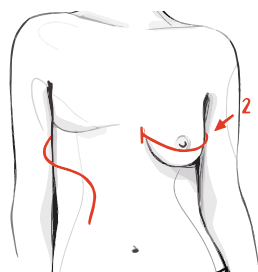

Take the bust measurement (2) by holding the tape horizontally over the widest point of the breast.

### Use the chart to find out the cup size

### Pants size

To work out the pants size, measure the waist (3) by holding the tape horizontally around the smallest part of the waist. Measure the hips (4) by holding the tape horizontally around the widest part of the hips.

If there is a considerable difference between the waist and hip measurement, always take the larger size.

## Method 2

### 2. Bust measurement

Slightly lift the naked breast. Measure from the breastbone to the centre of the back. Deduct 2 cm and then double the resulting value.

(1. Underbust measurement and 2. cup size are calculated in the same way as with method 1)

# Breast form measurement table

From the bra size to the breast form size

① Find bra size / ② Find cup size / ③ Select breast form

Example: bra size **85 C** = breast form size **90 / 7**

The explanations provided here are intended as a guide to help you choose the most suitable breast form for your customer. They can never be wholly accurate as each body type is different and surgical procedures vary - you should therefore also rely on your own experience and intuition. If you aren't 100% sure, try the T-shirt test to check that the breast form fits well and remains invisible under tight-fitting clothing.

# Shapefactor Special bras

Shapefactor is a system developed by Anita which quickly determines the right product to enhance the shape of the body.

## for example.: Shapefactor

**5750X C3** ..... Article number + support factor

..... Special features

**Cup A-E** ..... Available sizes

D/EUR 75-105  
GB/US 34-46  
France 90-120  
Italia 3-9

**001** **612** ..... Available colours  
**774**

## Support factor

- C1 = light support
- C2 = medium support
- C3 = firm support
- C4 = extra firm support

## Material key

- CO = cotton
- CV = viscose
- EL = elastane
- PA = polyamide
- PES = polyester
- PU = polyurethane

## Colour key

- 001** = black
- 006** = white
- 007** = skin
- 047** = champagne
- 254** = heather grey
